HEMS Kit Bag

The HEMS Kit Bag is a comprehensive and well configured equipment bag for the pre-hospital emergency care provider.

The bag has been designed by medical experts with considerable experience in pre-hospital emergency care, including Air Ambulance services. It is set out in a logical and practical manner with the management of the critically ill patient in mind. The rugged bag is constructed from material with waterproof and antibacterial properties and uses hard wearing zips.

Key features include an integral instrument panel, large sections for airway equipment and removable individual pouches. With its clear and modular layout, the HEMS Kit Bag is ideal for the RSI provider. A removable large padded bag provides safe storage of drugs while detachable inner pouches provide additional flexibility. The bag is designed to be carried several ways including as a back pack.

The HEMS Kit Bag can be supplied packed or unpacked and is ideal for all pre-hospital medical providers, from paramedics and pre-hospital emergency care doctors to Air Ambulance physicians and hospital medical response teams.
