Team-8™ Stretcher

Lightweight, compact and rapidly deployable, the Team-8™ Stretcher is designed specifically to rescue casualties from a hazardous environment.

Constructed of lightweight but highly durable polyethylene, the Team-8™ is one of the most man-portable yet effective stretchers of its kind. Designed to be used in hazardous environments, the Team-8™ has extensive operational use in military and law enforcement operations domestically and overseas.

The Team-8™ rapidly deploys from its carrying bag and the casualty is quickly and easily secured using the colour-coded webbing straps with quick-release buckles. This is highly advantageous in non-permissive environments.

A key feature is that it can be used both as a lift and as a drag stretcher, providing the Team-8™ flexibility for rapid extrication of the casualty even by a single rescuer.

Designed by experienced former Special Forces medics, the Team-8™ Stretcher is considered to be the best stretcher of its kind.

NSN: 6530-99-359-4978

Specifications	
Size folded	560mm x 160mm
Size unfolded	2100mm x 465mm x 1mm
Weight	2.4kg
Carry Handles	8
Quick Release Buckles	4
Quick Release Grab Handle	1
Price	Available on request
